

Remote Access

Policy Code: 3230

Protection of Data

Franklin County Schools must protect its critical data and resources against unauthorized access, malicious access, and disruption of service. Remote access to systems and networks by authorized users may be permitted through secure, authenticated and carefully managed access methods.

Authorized Access

Authorized remote access users should take every precaution to prevent compromising confidential data. Such precautions include using proper user identifications and passwords, as well as securing of the actual device used for access. Devices used to access these systems should have the latest security software and patches, including anti-virus, anti-spyware, and anti-adware with up-to-date definition files.
