The above data represents the number of students in the gifted pool for the school years 2007-2010. (High school high achievers are non-AIG students that are registered to take Advanced Placement or Honors classes.) Due to program changes there is a noticeable drop in the number of elementary students. However, the implementation of the Primary Education Thinking Skills program in grades Kindergarten through 3<sup>rd</sup> encompasses all students in an effort to reach the under-served populations.
